for Magnetic Balloon Whisk by Hansol Kwon.

Red Dot Honorary Mention
for Teacup by Laura Bougdanos and Vesa Jääskö.

Fennia Prize Honorary Mention
for Teacup.

Good Design Award
for Teacup.

Housewares Design Awards Finalist
for Cake Server by Maria Kivijärvi.

GIA Honorable Mention
for Cake Server Color.

2012

Good Design Award
for Serving Set by Maria Kivijärvi.

Excellence In Housewares Awards Finalist
for Cutting Board by Magisso.

2013

Red Dot Design Award
for Foldable Tools by Juhani Sirén.

GIA Finalist
for Foldable Tools.

German Design Award Nominee
for Teacup by Laura Bougdanos and Vesa Jääskö.

2014

GIA Best Collection
for Cooling Ceramics by Simon Stevens.

Good Design Award
for Cooling Ceramics.

Fennia Prize Honorary Mention
for Cooling Ceramics.

German Design Award Nominee
for Cake Server by Maria Kivijärvi.

2015

Good Design Award
for BULB Citrus Reamer by Simon Stevens.

Good Design Award
for Oil & Vinegar Bottle by Böttcher Henssler Kayser.

Red Dot Design Award
for Cool-ID Tumbler by Simon Stevens.

Accent On Design
for Cooling Ceramics by Simon Stevens.

2016

GIA finalist
for White Line Cooling Carafe.

2017

Global Innovation Award (GIA)
for Pino Wine Glass by Simon Stevens.

European Product Design Award
for Happy Pet Project by Magisso.

Good Design Award
for Vertigo Fruit Plate by Simon Stevens.

2018

German Design Award
for Pino Pint by Simo Lahtinen.

Good Design Award
for Lippa Tea Infuser by Brian Khouw.

Tableware International Award of Excellence
for Pino Pint.

2019

German Design Award
for Lippa.

Good Design Award Japan
for Visibility Bottle,

GIA Finalist
Visibility Bottle.

Tableware International Award of Excellence
for Aero by Simon Stevens.

HAPPY SiNKS

New concept by Magisso fighting against boring housework by creating sustainable, surprising and super-useful products for cleaning.

★★★★★

“The best design I have ever bought.”

Elizabeth C

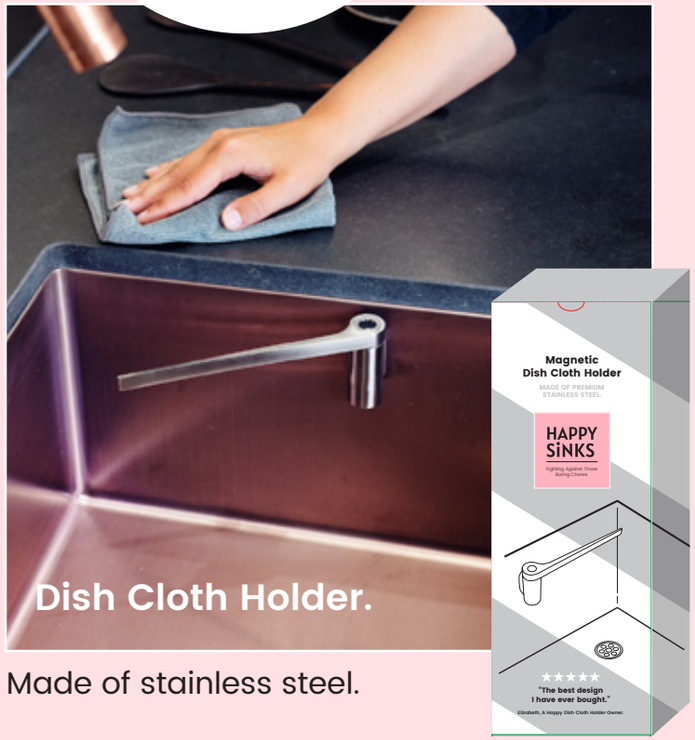
HAPPY SiNKS

Hardware

★★★★★

What a great solution to hanging your dishcloth!!

Tammy



Made of stainless steel.

Made of biocomposite.

Made of stainless steel
or biocomposite.

Already 250 000 units sold!

HAPPY SiNKS

Software

Each sandwich box contains 3 patterned organic cotton dish cloths.

Sustainable choice for cleaning:

✔ Made of GOTS certified 100% organic cotton.
✔ Pesticide free.
✔ No microplastics.
✔ For machine washing.

★★★★★

“No more bad odors! We are buying several more. Worth every dollar!”

Elizabeth C.

Cooling Ceramics

More than just a beautiful surface.

✔ Natural cooling with 0% energy.
✔ Keeps cool for hours.

Cooling Ceramics

“Looks so good that our guests even want to buy it from us.”

Elina, owner of Michelin noted restaurant Toca

The awarded MAGISSO Cooling Ceramics keeps drinks cold. And you won’t need a freezer or a fridge.

Just soak the MAGISSO Cooling Ceramics in water for 60 seconds to start the natural cooling effect that lasts for hours.

Easy and effective!

The MAGISSO Cooling Ceramics is LFGB and FDA approved.

Patented technology.

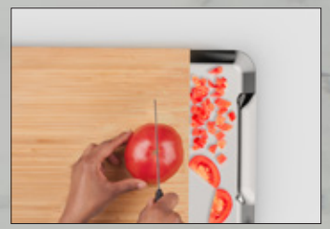
NY NOW

FENNIAprize 14 HONORARY MENTION

“Handy cutting board with removable trays on both sides that you can use to pour peels to compost and chopped onions on the pan.”

Venla

Cutting Board Collect

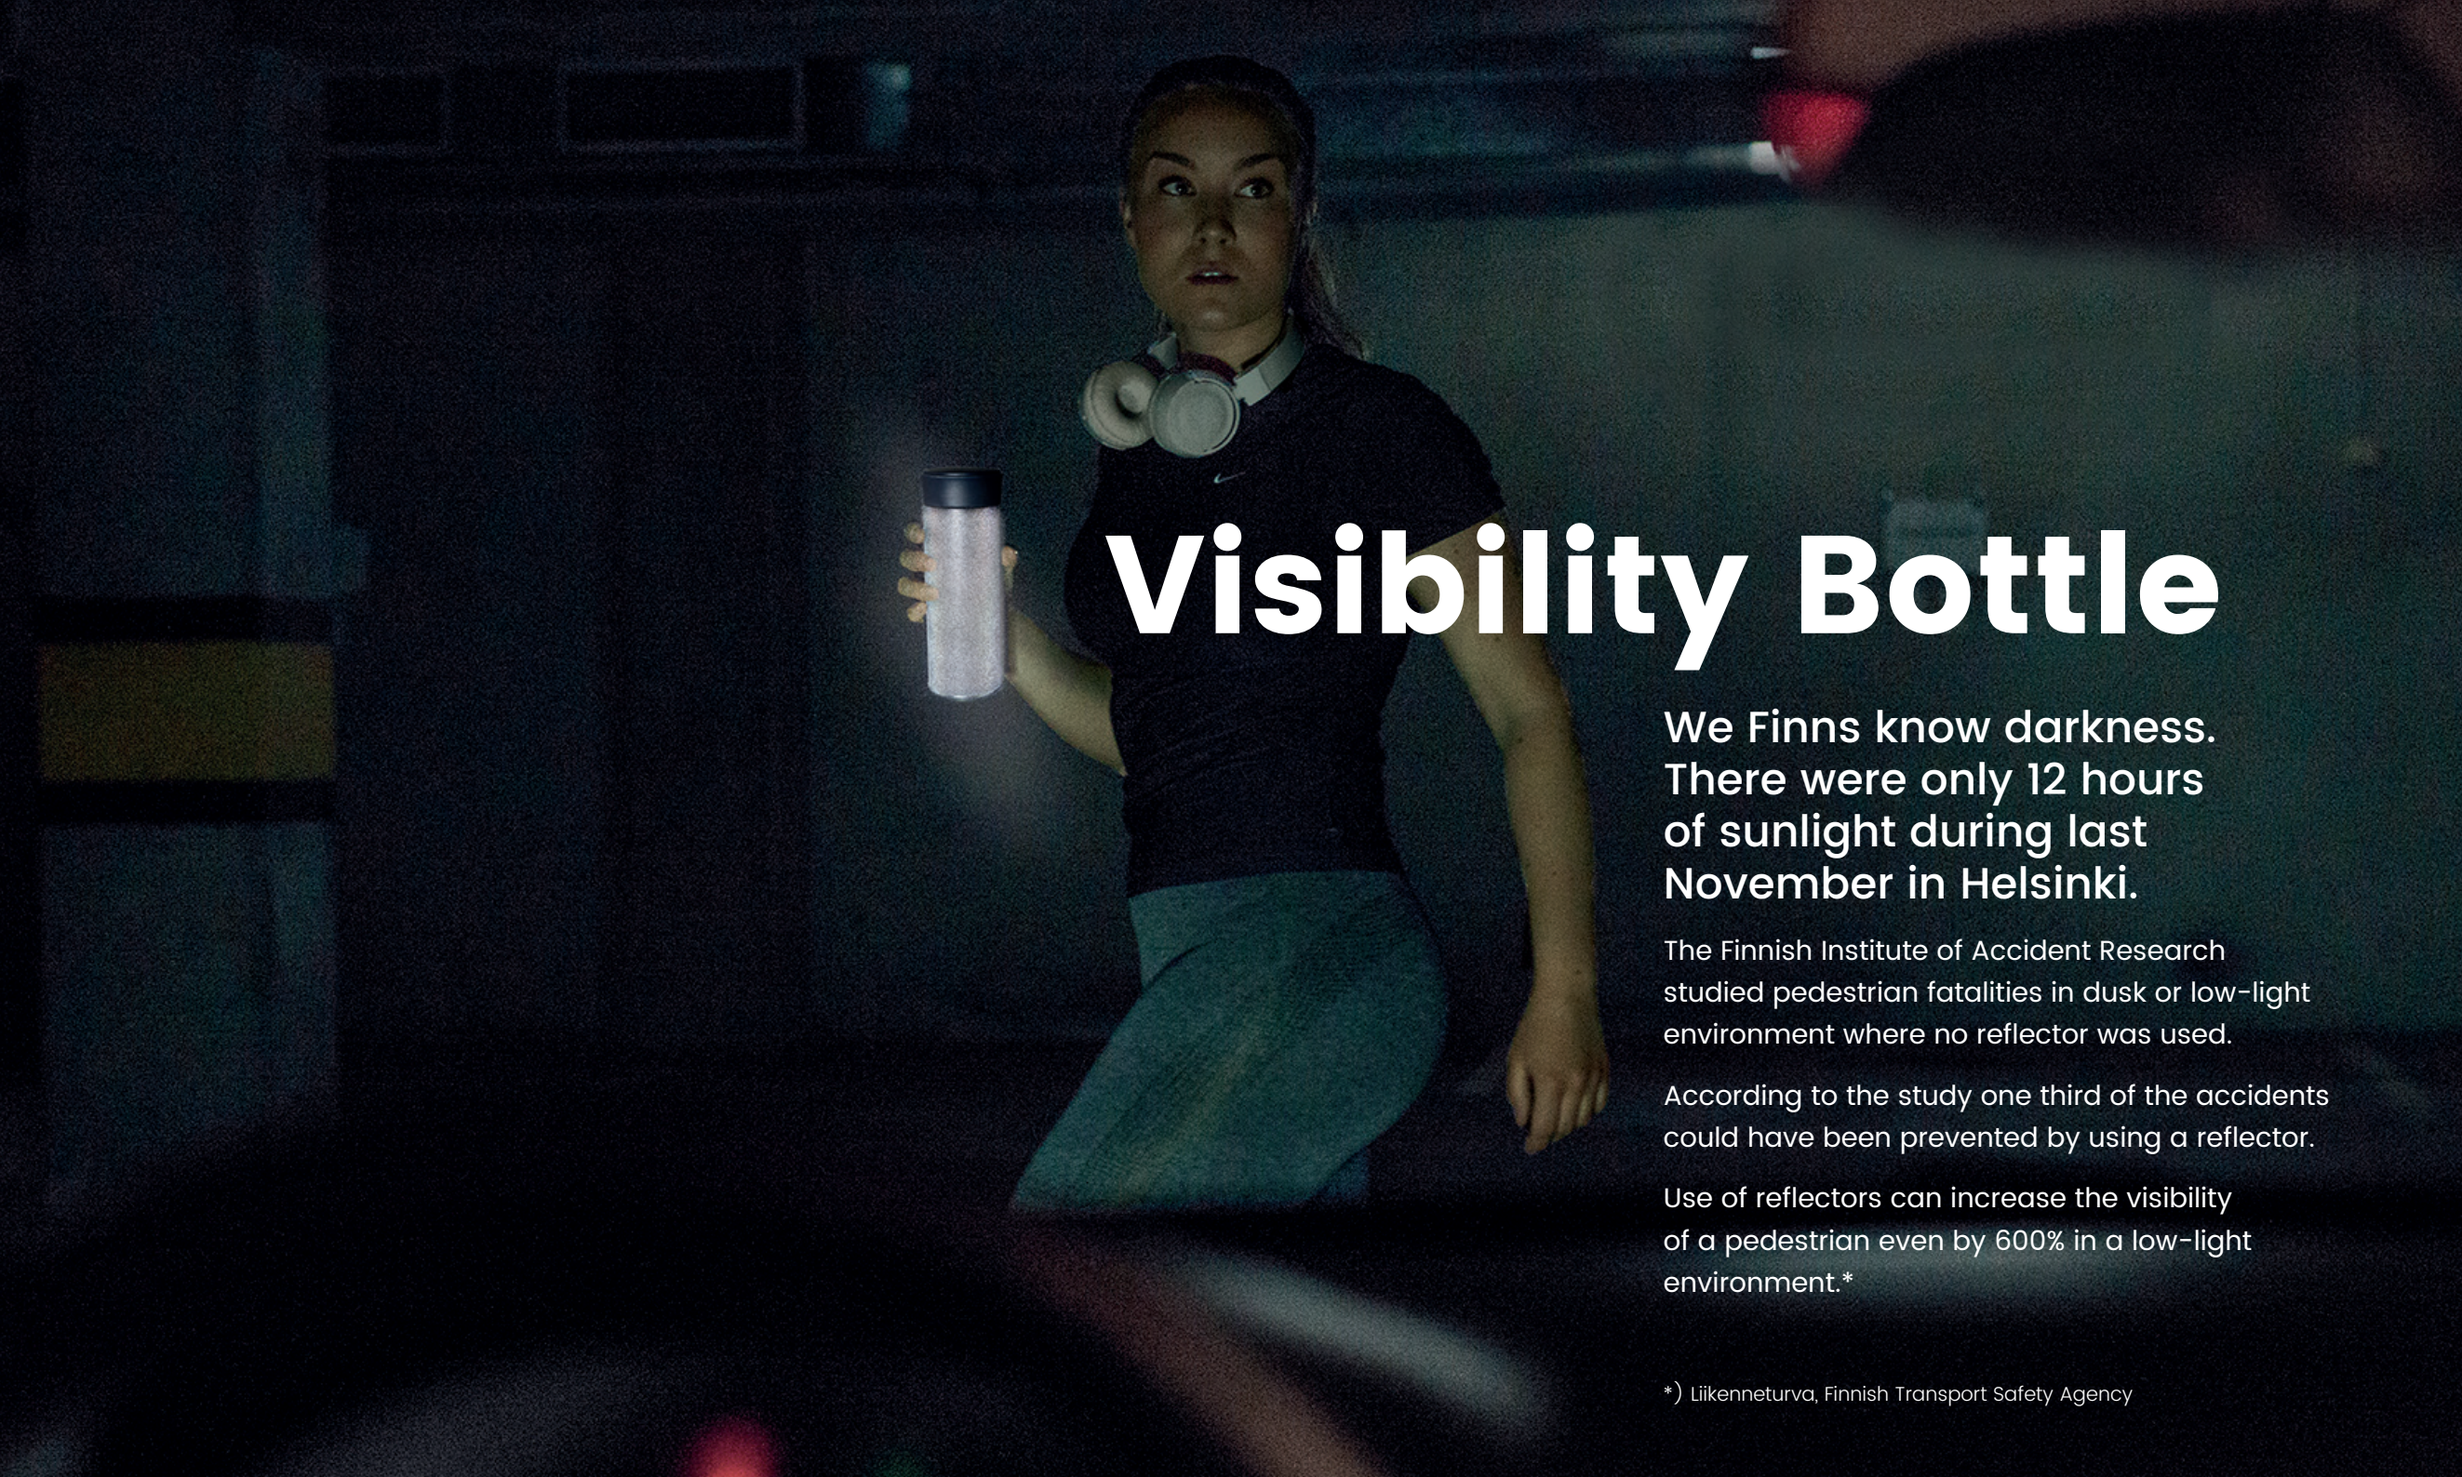


Use the two steel collector trays on both sides to transfer ingredients easily to the bowl or pan, or to move the waste to the bin.

Rubber feet makes the board stable and safe to use.
The high-quality bamboo is naturally anti-bacterial.

“I just love these small everyday life improvements.”

Emmi



Visibility Bottle

We Finns know darkness. There were only 12 hours of sunlight during last November in Helsinki.

The Finnish Institute of Accident Research studied pedestrian fatalities in dusk or low-light environment where no reflector was used.

According to the study one third of the accidents could have been prevented by using a reflector.

Use of reflectors can increase the visibility of a pedestrian even by 600% in a low-light environment.*

*) Liikenneturva, Finnish Transport Safety Agency

For a Brighter Future

Be responsible. Be visible.

Visibility Bottle – by the awarded design lab Magisso – is the world's first reflective thermos gear. Designed to make you more visible in low-light environments.

Surface treatment of the Visibility Bottle reflects car headlights and lights up the bottle and makes you noted in traffic.

Use it when commuting, exercising, walking your dog or going back to school.

Visibility Bottles are coated with reflective surface, developed together in cooperation with the world's largest vacuum bottle producer exclusively for Magisso.

Kiitos. (Thank you in Finnish.)
